Design

Modern, sleek, desirable.

Stylish design.
The AEG-Electrolux cooling range has a stylish design that supports the modern, sleek yet simple kitchen design. The pale blue interiors with Alu-silver and square push buttons complement their modern appearance.

AEG-Electrolux cooling appliances are designed to store food in perfect condition. Whatever the space available, our range has the storage capacity to suit every lifestyle and the appearance to enhance the design of every kitchen.

A range of different sized cooling appliances to suit every kitchen design, from under-counter appliances, to models that can be installed in-column at eye level. For the dedicated wine buff, there is even a wine cooler that will store both red and white wine at the perfect temperature.

Energy efficient.
All AEG-Electrolux models are A or A+, designed to be the most economical cooling products you can buy, whilst silent technology means the noise output is minimal, contributing to a pleasant kitchen environment.
Our cooling models are 100% CFC and HFC free. This means that they cause no harm to the ozone layer, and also do not contribute to the greenhouse effect.

Control

Precise control for peace of mind.

Precise control.
A host of advanced features offer you total control over your high-performance AEG-Electrolux cooling appliance. All fridge freezers feature an adjustable thermostat for easy adjustment of the internal temperature of the fridge freezer. The Coolmatic feature on fridges offers you fast chilling of fresh foods, whilst the Frostmatic feature quickly freezes food just placed in the freezer, ensuring all food is stored in optimum condition. Simple controls make operation easy and both Coolmatic and Frostmatic automatically switch off after a set period and return to normal temperature.

Maintaining perfect conditions.
The holiday mode sets the temperature of the fridge cabinet to 14°C without affecting the freezer. This is very useful particularly on occasions where the fridge will not be used for an extended period of time (e.g. holidays). The temperature set by the holiday mode allows the preservation of food such as butter and eggs and it prevents the creation of unpleasant odours whilst the door remains closed for a long period of time. Once back from holidays it will be easy for the fridge to recover to its normal temperature.

Advanced electronic interface.
Advanced electronic temperature controls are simple to use and ensure precise temperature control. The controls are child proof and the LCD /LED display provides reassurance that the optimum temperature is being maintained, providing the best conditions for your food.
High Temperature Indicator signals if the temperature rises (such as during a power cut). Door Indicator (visual and/or audible) signals if the door is open. Service Indicator signals if there is a fault requiring technical assistance.

Features

Store food in perfect conditions.

Coolmatic.

By simply choosing the coolmatic setting the temperature is set to +2°C allowing you to quickly chill new shopping to preserve the flavour, colour and nutritional value of the foods as well as protecting food that is already being stored. This function automatically returns to the pre-selected temperature.

Keep food fresher for longer.

Longfresh Chill Zones allow food to be kept fresher for longer at a low temperature of around 0-3°C. The natural humidity level of the food can be manually controlled with the humidity control device. Lower humidity is ideal for storing meat, fish and dairy products, whilst higher humidity is perfect for fruit and vegetables. So your fresh food can be safely kept for longer in optimum condition, retaining vitamins and nutrient content, flavour and appearance. This feature is perfect for those with a busy lifestyle who would rather do one big shop than lots of smaller ones.

Electronic controls.

The AEG-Electrolux electronic controls advise if the temperature is correct. Audible alarms sound if the temperature increases or the door is left open.

Covered dairy compartment.

The covered dairy compartment for cheese and butter ensures dairy to be kept at the ideal temperature. There is also a range of full and half depth shelves which offer increased storage flexibility.

Tilted wine racks.

Tilted wine racks are ideal or storing wine in optimum condition.

Extra strong glass shelves.

Extra strong glass shelves retain the cold, are easy to clean and can prevent spillages contaminating the other foods.

No more defrosting.

AEG-Electrolux frost-free freezers completely remove the need to defrost your freezer, giving you total convenience and saving valuable time cleaning. Frost-free freezers also offer efficient and effective freezing with quicker, more even chilling for better food preservation. Food never sticks together or gets frosted over so you can easily find what you are looking for.

In addition, we have the first 50:50 total frost-free fridge freezer. A unique air circulation system ensures that both the fridge and the freezer remain frost and condensation free. All other fridges in the range also feature "auto-defrost".

Frostmatic.

The Frostmatic feature is ideal when putting fresh food in the freezer, electronic controls quickly freeze the food to the preset temperature, preserving the flavour, nutritional value and colour of food, in addition to protecting already frozen food. This function automatically returns to the pre-selected temperature.

Efficient freezing.

The turbo freezing function is ideal when putting fresh food in the freezer. The push button control freezes the food as fast as possible to preserve flavour, nutritional value and colour of food.

Premium freezer compartments.

A range of versatile storage is provided in AEG-Electrolux cooling appliances to ensure the very best food preservation.

4-star freezer compartments.

All of our models have 4-star freezer compartments enabling you to freeze fresh food. Store frozen foods for up to one year with excellent visibility of frozen foods.

Maxi box drawer.

The maxi box is ideal for freezing those larger items from the Christmas Turkey to birthday cakes.
